

About Me!

Jonathan Wu

Data Scientist I @ Sibel Health

Jonathan Wu is currently working as a Data Scientist at Sibel Health with a mission to deliver Better Health Data for All®. He has a bachelor's and master's of science in Biomedical Engineering (BME) from Johns Hopkins University. He is passionate about all things healthcare and innovation, and hopes to use his skills to make an impact on medical care and public health.

Current Projects

Module 1: Web Applications

GitHub Repository: [JHU Software Concepts Module 1](#)

After exploring what web applications are, understanding their underlying principles, and learning how to build, test, and deploy them both locally and using cloud services like AWS, this first project challenges us to build our own website. This site will serve as a portfolio to showcase the upcoming works that we will be accomplishing in this course.
